StyleReserve

Department of Information System
김태현 박세은 이승호 허정윤

Application About

Role of the StyleReserve

- Extended the LG Styler environment from home to company, assuming that many people can use the product
- Tried to fix the time issues when using the Styler through software
- Considered the Styler's ability to tidy up clothes, and tried to bring software-level support to help users wear good clothes on important days

Provided Functions

StyleR + eserve
Reserve your Style,
Deserve to use Styler

1) Styler Calendar

can schedule the use of a Styler in the schedule calendar. If there are any seats left, other people can also make reservations together.

2) Styling Calendar

can make a reservation by taking clothes from the closet database

Customer Needs

☹️ Problem 1. 열려 나가야 하는데 옷이 구겨져 있어요

오늘 입고 나가려고 꺼낸 옷, 그런데 옷장에 너무 오래 있었기 때문인. 하는데, 옷 상태가 이러니... 내가 입을 옷을 미리 세팅해 놓았다면 좋았을 텐데... 그런데 어제 미리 다림질을 해놓기에는 너무 귀찮고 피곤했던 말이죠 군가가 있다면 얼마나 좋을까요?

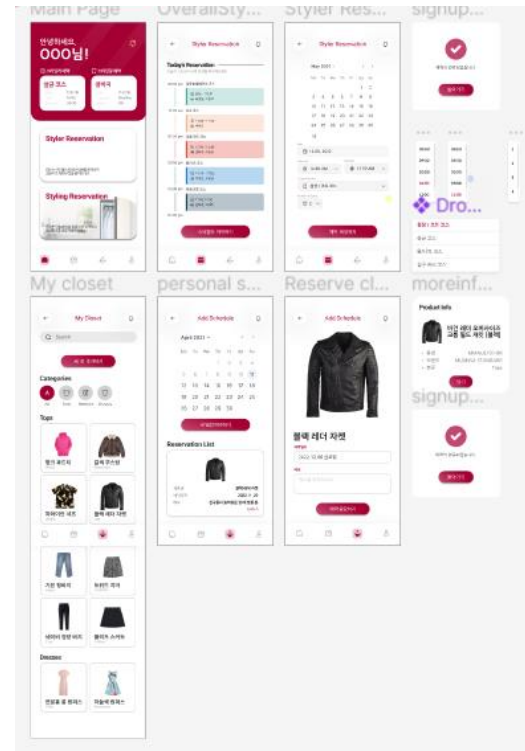

☹️ Problem2. 내가 입으려던 옷, 언니가 입고 나갔어요!

오늘 제가 입고 나가려던 옷이 한참 찾아도 없더라고요. 알고보니 언니들 꼭 그 옷을 입었어야 했는데... 그렇다고 언니에게 매일매일 "이 옷, 잠아요... 이러한 문제를 해결하는 방법은 없을까요?"

+ :: ☹️ Problem3. 코디가 너무 어려워요

Z세대에게 패션은 나를 표현하는 하나의 방법! 그런데 미적 감각이 부족을 어떻게 입으면 좋을지에 대한 고민이 너무 많아요... 스타일러로서만 아니라 상대적으로 젊은 나의 스타일링을 도와주는 기능은 없을까

- Find customer need
- Plan functions to help users in daily lives

- Design through Figma

Frontend: 박세은, 허정윤

Backend: 김태현, 이승호

Recent Process

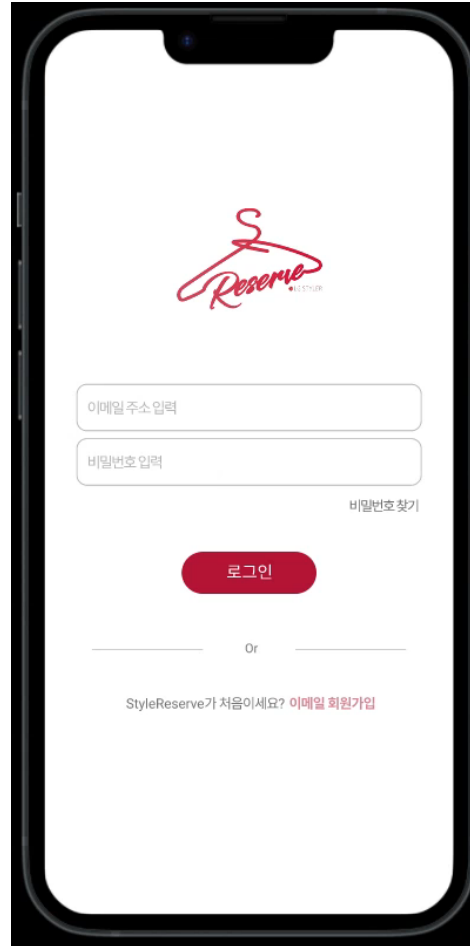

Front-end

Jobs Done

- Finish making UI/UX and developing user scenario

Further works
